

bs 5950 pdf

BS 5950 is a withdrawn British Standard for the design, fabrication and erection of structural steelwork. It does not apply to bridges, which are covered by BS 5400. BS 5950 replaced BS 449, which used a permissible stress approach, and uses limit state design methods. It is written for use in the UK but can be used worldwide. It was superseded by BS EN 1993 on 30 March 2010 and withdrawn.

British Standards (BS) are the standards produced by the BSI Group which is incorporated under a Royal Charter (and which is formally designated as the National Standards Body (NSB) for the UK). The BSI Group produces British Standards under the authority of the Charter, which lays down as one of the BSI's objectives to: (2) Set up standards of quality for goods and services, and prepare and ...

Portal frames are generally low-rise structures, comprising columns and horizontal or pitched rafters, connected by moment-resisting connections. Resistance to lateral and vertical actions is provided by the rigidity of the connections and the bending stiffness of the members, which is increased by a suitable haunch or deepening of the rafter sections.

Portal frames - Steelconstruction.info

1 Header Adapters are required if you are not running a TTI Header to a TTI Exhaust System. When ordering headers, the header make and model number will be required. Application Note: Header Adapters by TTI were designed utilizing new unmodified Hooker, Hedman & Thorley Headers to mate with TTI exhaust systems. Precision tooling-fixtures are used to insure exact replication of each ...
