An embedded system is a programmed controlling and operating system with a dedicated function within a larger mechanical or electrical system, often with real-time computing constraints. It is embedded as part of a complete device often including hardware and mechanical parts. Embedded systems control many devices in common use today. Ninety-eight percent of all microprocessors are ...

Tibetan history, as it has been recorded, is particularly focused on the history of Buddhism in Tibet. This is partly due to the pivotal role this religion has played in the development of Tibetan and Mongol cultures and partly because almost all native historians of the country were Buddhist monks.
