Deep Learning for NLP (without Magic) - Stanford NLP Group

This is the second offering of this course. The class is designed to introduce students to deep learning for natural language processing. We will place a particular emphasis on Neural Networks, which are a class of deep learning models that have recently obtained improvements in many different NLP tasks.

CS224d: Deep Learning for Natural Language Processing

The book "Deep Learning for Natural Language Processing" focuses on how to use a variety of different networks (including LSTMs) for text prediction problems. The LSTM book can support the NLP book, but it is not a prerequisite.
