Computer animation physics or game physics involves the introduction of the laws of physics into a simulation or game engine, particularly in 3D computer graphics, for the purpose of making the effects appear more realistic to the observer. Typically, simulation physics is only a close approximation to actual physics, and computation is performed using discrete values.

There is a large variety of puzzle game types. Some feed to the player a random assortment of blocks or pieces that they must organize in the correct manner, such as Tetris, Klax and Lumines. Others present a preset game board or pieces and challenge the player to solve the puzzle by achieving a goal (Bomberman, The Incredible Machine). Puzzle games are often easy to develop and adapt, being ...

The first-order approximation to the solution of the Boltzmann-Curtiss transport equation is derived. The resulting distribution function treats the rotation or gyration of spherical particles as an independent classical variable, deviating from the quantum mechanical treatment of molecular rotation found in the Wang Chang-Uhlenbeck equation.
