

### heat y thermodynamics zemansky pdf

The Clausius theorem (1855) states that a system exchanging heat with external reservoirs and undergoing a cyclic process, is one that ultimately returns a system to its original state,  $\oint \frac{\delta Q}{T} \leq 0$ , where  $\delta Q$  is the infinitesimal amount of heat absorbed by the system from the reservoir and  $T$  is the temperature of the external reservoir (surroundings) at a particular instant in time.

### Clausius theorem - Wikipedia

The enthalpy of vaporization, (symbol  $\Delta H_{\text{vap}}$ ) also known as the (latent) heat of vaporization or heat of evaporation, is the amount of energy that must be added to a liquid substance, to transform a quantity of that substance into a gas. The enthalpy of vaporization is a function of the pressure at which that transformation takes place. The enthalpy of vaporization is often quoted for the ...

En 1845, Joule lit son article On the mechanical equivalent of heat à une réunion de la British Association à Cambridge [11]. Il y relate son travail le plus connu, utilisant une masse tombante pour faire tourner une roue à aubes dans un cylindre calorifugé rempli d'eau dont l'évaluation de température est mesurée. Il estime à ce moment l'équivalent mécanique de la chaleur à 819 ...
