Pages in category "Human physiology" The following 44 pages are in this category, out of 44 total. This list may not reflect recent changes ().

Category:Human physiology - Wikipedia

The human body is the structure of a human being. It is composed of many different types of cells that together create tissues and subsequently organ systems. They ensure homeostasis and the viability of the human body.. It comprises a head, neck, trunk (which includes the thorax and abdomen), arms and hands, legs and feet. The study of the human body involves anatomy, physiology, histology and ...
