The first-move advantage in chess is the inherent advantage of the player who makes the first move in chess.Chess players and theorists generally agree that White begins the game with some advantage. Since 1851, compiled statistics support this view; White consistently wins slightly more often than Black, usually scoring between 52 and 56 percent.. White's winning percentage is about the same ...

The history of chess goes back almost 1500 years. The game originated in northern India in the 6th century AD and spread to Persia.When the Arabs conquered Persia, chess was taken up by the Muslim world and subsequently, through the Moorish conquest of Spain, spread to Southern Europe.. In Europe, the moves of the pieces changed in the 15th century. The modern game starts with these changes.

The recent movie "Transcendence" will not be troubling the sci-fi canon of classics, if the reviews are anything to go by. But its central plot device – "uploading" a human consciousness to a computer – remains both a central aspiration of transhumanists, and a source of queasy fascination to the rest of us. The idea is that someone's mind is simply a computer programme, that in ...

Intelligence To be intelligent you first have to know what being Intelligent is. And you also have to know what being ignorant is. Ignorant is just another word for "Not knowing".But not knowing is not always obvious or clearly understood.That's because learning is not fully understood. The more you learn the more you should realize what you didn't know.
