The qualitative approach to research design leads to studies that are quite different from those designed using the more traditional approach. The traditional approach, often referred to as quantitative research, leads to hypothesis-testing research, whereas the qualitative approach leads to hypothesis-generating research. This chapter will describe the difference

Polarography is a voltammetric measurement whose response is determined by combined diffusion/convection mass transport. The simple principle of polarography is the study of solutions or of electrode processes by means of electrolysis with two electrodes, one polarizable and one unpolarizable, the former formed by mercury regularly dropping from a capillary tube.
