The seven basic tools of quality is a designation given to a fixed set of graphical techniques identified as being most helpful in troubleshooting issues related to quality. They are called basic because they are suitable for people with little formal training in statistics and because they can be used to solve the vast majority of quality-related issues.

In process improvement efforts, the process performance index is an estimate of the process capability of a process during its initial set-up, before it has been brought into a state of statistical control.. Formally, if the upper and lower specifications of the process are USL and LSL, the estimated mean of the process is $\hat{\mu}$, and the estimated variability of the process (expressed as a ...
